Baklandet

Baklandet is also known as the oldest part of the city centre. It is the name for the colourful wooden houses and narrow streets along the east side of Nidelv River, right where the Old Town Bridge from 1861 is located. The red Old Town Bridge was only constructed as a draw bridge in 1681 after the big fire. The area is most charming and has a special atmosphere. Here you will also find the only bicycle lift in the world called "Trampe".

TOUR 17 HIKING IN ESTENSTADMARKA

Experience Norwegian nature like the locals on this challenging hike through Estenstadmarka and Burmaklippen, Trondheims "mini Trolltunga".

DESCRIPTION

A coach brings you to Bekken parking where the hike starts towards Burmaklippen. Although this cliff, does not have the same dimensions or equal height of the well known Trolltunga, it is still worth the trek. Following a forest path upward you pass a small creek and take a slightly secluded path downward to the Burma rock. The cliff leans down slightly towards the tip so one feels the source of gravity and gives a sense that you are actually higher up than 50 m. From the top of the cliff you can see over the beautiful cultural landscape and toward Trondheimsfjord.

Continuing on through Estenstadmarka make your way to a mountain lodge where you will be treated to refreshments and have time to enjoy the tranquil scenery before heading back down the trail passing by lakes.
